

DIY Cork Hat

Create your own hat to keep the Flies and Mozzies away!

Materials

- An old broad brimmed hat (fabric or straw)
- Fishing line or string
- 6-8 Corks
- Scissors
- Scalpel
- Sharp needle
- Optional - drill and small drill bit

Steps

1

Measure and cut a 15cm length of string for each of the corks you have collected. Ask an adult to help make a small incision at the end of each cork with the scalpel.

2

Ask an adult to help pierce holes in the fabric or straw hat at intervals around the edge of the hat, with scissors or a sharp needle.

3

Thread the string through the hole in the hat and tie a knot. Then wrap the string around the cork and feed through the small slit made in the end. This will help to secure the string. Tie another knot to secure the cork and Bob's your uncle!

Optional: You can drill a hole through each cork if you have the resources.
